INSTRUCTIONS—INFORMATION

To those who are unacquainted with the different classes and varieties of Dahlias I would suggest that such leave the selection to me. Send me the amount of money you wish to invest and in return I will send you those that will surely delight. Also my liberal filling of the order will more than be satisfactory.

ORDER EARLY—As orders are filled in rotation—field-grown roots or thrifty plants if ordered—ordering early will insure the reservation of varieties that later may be sold out.

SUBSTITUTION—Orders are filled with varieties called for, and unless substitution is asked, I never substitute.

TIME OF SHIPMENT—Unless otherwise ordered, tubers will be shipped between April 15th and May 15th, by express or insured mail at my expense, on all orders of over \$2.00; under \$2.00 add 15c for postage.

TERMS—Cash with order unless parties are known to me. No goods sent C. O. D. unless 50 per cent of purchase price accompanies order.

GUARANTEE—I guarantee safe delivery. I guarantee all bulbs to grow and be true to name, and will cheerfully replace any that fail in either respect when not planted too early in wet or soggy ground causing tuber to rot. Not responsible for more than the purchase price of any tuber.

REMITTANCES should be made by bank draft, postoffice money order or registered letter. Postage stamps accepted up to \$2.00. Coin should not be sent by letter unless registered.

ERRORS—While my system for handling orders is as near perfect as possible, yet in the rush of business, errors are possible to occur, and I wish to be promptly notified of such and will at once make same satisfactory. Make all complaints to me, not to your friends, as we aim to please you.

NAME AND ADDRESS—Remember to write your NAME, POST-OFFICE, COUNTY and STATE, also give STREET NUMBER or P. O. BOX as plainly as possible.

REFERENCE—Any bank in Grand Rapids, Mich.

Growing instructions mailed with tubers.

An extra tuber given with all orders. Value 10 per cent of your order.

Plant list of many new Honor Roll Dahlias and better varieties sent on request after March 15th.

CULTURAL DIRECTIONS

Dahlias are easily grown, requiring no special soil treatment or skill to bring them to perfection, but a little special attention will bring you greater satisfaction.

They are really an Autumn flower and should not be planted too early.

They are remarkably free from disease and have few special enemies.

Plant in sunny situation, although they will do nicely in partial shade.

Prepare the soil by deep spading; if soil is sandy a shovel full of well rotted manure may be incorporated with it; if otherwise use little, if any, fertilizer before plants begin to bud. Add sand or coal ashes to heavy soil.

Drive a stake in each hole to support the plant. Lay tuber down flat with eye upward and close to stake, about five inches deep, and cover two inches with pulverized soil, gradually filling to level as plant progresses.

For extra large blooms, as soon as plants are large enough, pinch out the top just above the second or third set of leaves; this causes the plant to branch. Then pinch off all the buds except one and take off all the side branches on each of the main stalks, leaving the last two near the base of the stalks so when you cut the first flower you will have two canes to work on next. If tall plants are wanted cut off all but one stalk and keep tied up to stake.

Cultivate well until buds appear, then stop all cultivation except light raking after rain or watering, just enough to break the crust of ground; only be sure and do this.

When buds appear, spread manure or some fertilizer around plant and rake lightly into soil.

Sometimes a perfectly good tuber with a good eye will refuse to sprout. In such cases, dig up the tuber and soak for 24 hours in fresh water, this usually will cause it to sprout in a reasonable time after replanting.

Unless weather is very dry and hot, do not begin watering until buds appear, then soak the ground thoroughly (not sprinkle) about once a week or ten days. Cut off all faded flowers with as much of the stalk as you can.

If bothered by cut worms or slugs, cut a piece of tarred paper 3 inches wide by 10 or 12 inches long, form collar and place around plant, 1 inch below and 2 inches above the ground.

For cut flowers pick in the evening or early morning if possible; burn the ends of stems in any flame, or dip in boiling water for 10 seconds; after either treatment place in cold water and put in cool place free from draft until wanted.

When frozen down in Autumn, cut stalks off at the ground and dig carefully so as not to break neck of tuber, for the eyes for next season's growth are only found where the tuber joins the stalk. Store same as potatoes where they will not freeze, shrivel or rot. Turn the clump upside down to drain out any moisture that may start decay and when dried about two weeks I have the best success packing them upside down in wooden boxes with a sheet of paper over top.

To restore wilted blooms, dissolve a tablet of Aspirin in warm water, and place flowers therein. This will freshen some varieties but not all of them. Fresh water and cutting off the base of stems daily usually proves best.

I am always pleased to answer any questions regarding Dahlia culture.

ATTENTION!

A word about our collections. Many other growers list their varieties much higher and offer collections at a great reduction or guaranteed book value. Compare them with our prices first before ordering.

Classification of Dahlias

FORMAL DECORATIVE DAHLIAS (F. D.)

Fully double flowers, with the margins of the floral rays slightly or not at all revolute, floral rays generally broad, either pointed or rounded at tips, with outer floral rays tending to recurve and central floral rays tending to be cupped; all floral rays in a somewhat regular arrangement. For example, Sagamore, Jersey Beauty, Regal, Glory of Monmouth, Trentonian, Mrs. I. de Ver Warner and Judge Marean.

INFORMAL DECORATIVE DAHLIAS (I. D.)

Fully double flowers, with margins of the floral rays slightly or not at all revolute, floral rays generally long, twisted or pointed, and usually irregular in arrangement. For example, Fort Monmouth, Jane Cowl, Barbara Redfern, Mrs. Alfred B. Seal, Insulinde, Kathleen Norris.

INCURVED CACTUS DAHLIAS (I. C.)

Fully double flowers with the margins of the majority of the floral rays revolute for one-half or more of their length, the floral rays tending to curve toward the center of the flowers. For example, F. W. Fellows, Bearclaws Farncot.

RECURVED AND STRAIGHT CACTUS DAHLIAS (R. C.)

Fully double flowers, with the margins of the majority of the floral rays revolute for one-half of their length or more, the floral rays being recurved or straight. For example, Ambassador.

SEMI-CACTUS DAHLIAS (S. C.)

Fully double flowers, with the margins of the majority of the floral rays revolute for less than one-half of their length. For example, Edna Ferber, Francis Lobdell, Sun-kiss, Alice Whittier.

PEONY DAHLIAS (Peo)

Long wavy petals, open centered flowers.
